

1985 PRODUCTION GUIDE

Compiled by Jamie Gaetz, Linda Gorman,
Gillian Robinson and Connie Tadros

Canadian Theatrical Features

The following is a list of live-action film and video productions shot in Canada in 1985. The categories are theatrical features, television features, one-hour TV programs and series of one-half hour segments or more (Canadian and foreign). Although the list is as complete as we were able to make it, we realise that there may be some omissions, especially in the "series" category where production is more difficult to follow. Nor, given the intricacies of multi-partner financing, has it always been possible to determine with complete accuracy whether a feature is indeed for theatrical or television release.

The information given on the various productions is as follows: Title, name of production company (p.c.), producer (p.). Due to space and time limitations, associate producers, executive producers and various other qualified producers are not mentioned. Director (d.). Dates of the shoot, and, in many cases, the location of the shoot. A budget estimate of the production, when available.

The final line contains notes on the production's sources of funding, whether an investment, a pre-sale, a broadcasting license, etc. Common abbreviations are as follows: AMPDC - Alberta Motion Picture Development Corp., CBC - Canadian Broadcasting Corporation, RQ - Radio-Quebec, SGC - Société Générale du Cinéma, RC - Société Radio-Canada, TF - Telefilm. The word "co-production" is used for treaty co-productions only. An asterisk * following the title of the production indicates certification (either pending or granted) at the Canadian Film and Video Certification Office, department of Communications.

Telefilm... First to take action in
 Canadian television and film
 investment.
 By investing in quality
 television and film
 projects, Telefilm Canada
 is taking action to
 bring Canadians world
 class entertainment.
 And it's working! Today,
 Canadian audiences are
 enjoying new heights of
 first rate programming.
